Artificial Grass for Schools & Playgrounds

Safe, Child Friendly Artificial Grass
Expertly Designed & Installed

30
YEARS
EXPERIENCE

About Us

Easigrass has been leading the way in quality and innovation in the artificial grass industry for 30 years. The UK's No.1 supplier, we established our South Africa headquarters over a decade ago and have since been the trusted supplier of artificial grass for schools, homes and businesses alike.

We at Easigrass believe in safe play equipment in children's playground areas. All our artificial grass playgrounds are uniquely designed for each client's specific needs. Your artificial grass playground is an integral part of your education attributes within the school environment.

It is proven that most schools with artificial grass playgrounds are an attractive option when looking at school occupancy. Artificial grass playgrounds also allow for a hygienic and safe environment for children, due to the fact that there is no dust and there is little bacteria. We keep the play with the correct application and installation of shockpad surfaces and environmentally friendly bio-enzymes that are child- friendly, pet and eco friendly.

Benefits

With over 30 years experience working within the schools & education sector, Easigrass is at the forefront of playground and school artificial grass surfaces. With the introduction of our new and advanced Play Elite Artificial Grass we provide your industry with a unique and high performing solution to high Traffic areas, indoor and outdoor play areas.

Water

Easigrass doesn't need watering so you can dramatically reduce your water bill, as well as helping the local environment.

Time

Easigrass is low maintenance so you will have more time to do the things you enjoy.

maintenance

Our surfaces are very low maintenance, and require annual treatments to ensure performance.

Sun

All of our products are manufactured with the highest quality UVA & UVB protection.

Chemical Free

Our entire range is tested to show that it is free of lead and other harmful chemicals.

Safety

Easigrass is safe, soft and clean. Ideal for your children to play on.

Play Areas

Working with only the highest quality materials and skills crafted over three decades, we're proud at Easigrass to be the number one supplier and installer for artificial grass playgrounds, child's play and sports areas at nurseries, schools, colleges and universities in South Africa.

For Schools

When you manage a school, it's important to save time and money, and to keep the pitches and play areas in usable condition all year round, no matter what the weather is doing. Artificial grass ticks a lot of boxes in this regard, as it's a no mud, no mess option that stays playable in all seasons.

Our specialist synthetic grass products are also incredibly low maintenance, eliminating the need for mowing, fertilising or the use of nasty chemicals. This means you can spend less time and money while still keeping the pitches and play areas pristine for your students.

Just a few of the applications our artificial grass can be used for include:

- Child play areas
- Bike tracks
- Football
- Hockey
- Cricket
- Tennis
- Padel
- Multi Sport pitches

Here at Easigrass, we also provide a maintenance service to keep your artificial grass performing at its best. This can be carried out as an annual visit, or more often if you prefer. Our experienced in-house Easigrass designers have developed different hard-wearing products for the specific demands

of nurseries, schools, colleges and children's play, including:

- Preschool artificial grass playgrounds
- Multi-play sports and leisure artificial grass for schools
- Play parks with climbing equipment
- Hard-wearing yet soft artificial grass for nurseries
- Play areas for hotel facilities

For added safety, we can install the latest in shock pad underlay technology for artificial grass playground areas to guarantee safe, comfortable play. On request, our professionals will present to school governors, as well as parent and teacher associations, sharing Easigrass expertise and knowledge, including full health and safety criteria.

Artificial Grass for Nurseries
As the only artificial grass brand endorsed by the National Day Nurseries Association (NDNA), we provide safe, smart, durable and fun surfaces that meet the highest national and international safety standards for children's play and sports.

Contact our friendly, professional school and nursery artificial grass experts today to learn how your organisation can play it safe with Easigrass. We offer comprehensive after-sales support for our child-safe artificial grass, including annual maintenance service contracts.

Our Commitment to Environmental Safety

Our award-winning artificial grass is not only super durable, but also easy on the environment too. Despite being hugged by a coastline and having good dam catchment infrastructure. South Africa officially remains a water-scarce country.

Easigrass requires no regular watering in order to look good, and as the grass is perforated, all natural water is filtered into the soil, which is great for the environment.

Another environmental benefit is that you don't need harmful pesticides to suppress weeds or encourage green grass growth. No wonder Easigrass both supports, and is loved by, leading horticultural societies.

The case for investing in premier, artificial grass such as Easigrass is a compelling one if you're looking for a safe, attractive, cost-effective and durable flooring solution, whether you are looking to cover a big garden or small urban space. It's a decision you'll be happy you made for many years to come.

Our Process

Our professional team will design your playground with you to ensure all your requirements are met.

We are invested in your success, and as such we will ensure you have just the right amount of artificial grass and safety equipment for your needs.

Our onsite foreman will keep you updated with all progress and installation steps. We will begin and end your journey with Easigrass in the most uninterrupted way possible to ensure your environment is hassle free and safe at all stages of the installation.

Once completed we will train your maintenance team to ensure peak performance all year round at a world class standard.

Annually we will assist you by servicing your grass ensuring longevity and that "brand new" look and feel.
